

Cookies policy

Last updated 7 October 2026

www.noraina.cloud does not use analytics, advertising or tracking cookies, and Noraina does not set any cookies of its own. The only cookies you may receive are strictly necessary security cookies set by Cloudflare, which delivers and protects the website.

1. What is a cookie?

A cookie is a small text file that a website stores in your browser and reads on later requests. Cookies can remember a choice, keep a session open, or track visits across websites. Similar technologies, such as browser storage and tracking pixels, are covered by this policy in the same way.

2. Cookies on our website

We do not use Google Analytics, advertising networks, social media pixels or any other analytics or marketing tool, so no cookie or similar technology is used to measure your visit, profile you or show you advertising.

Cloudflare may set the following cookies when its security features are triggered, for example when traffic looks automated or a request has to be checked:

Cookie	Set by	Purpose
__cf_bm	Cloudflare	Tells people from bots, so that automated traffic can be blocked.
cf_clearance	Cloudflare	Records that your browser has passed a security check, so you are not asked again on every page.
_cfuvid	Cloudflare	Applies rate limits fairly to visitors who share an IP address.

Pages with a contact or assessment form also load Cloudflare Turnstile, which checks that the form is sent by a person and not by a bot. Turnstile collects technical signals from your browser for that check only, and does not read what you write in the form. It is described in Cloudflare's Turnstile privacy addendum at www.cloudflare.com/turnstile-privacy-policy.

How long each cookie lasts is set by Cloudflare and described in its documentation. These cookies and checks are strictly necessary to keep the website secure, so the law does not require your consent for them and we do not show a cookie banner. They do not identify you to Noraina.

3. Our client area

The client area at dash.noraina.cloud uses cookies to keep you signed in, remember your preferences and protect your account. They are strictly necessary for the service you request and are not used for analytics or advertising.

4. How to manage cookies

You can block or delete cookies in your browser settings. If you block the Cloudflare security cookies, you may be asked to complete a security check more often, and some requests may be blocked. For more information about managing cookies, visit www.aboutcookies.org.

5. Changes and contact

If we start using other cookies, for example for analytics, we will update this policy first and, where the law requires it, ask for your consent before setting them. Our [privacy policy](#) explains how we handle personal data. For questions, email info@norainacloud.com.
